How to install your REMOVABLE WALL DECALS...just PEEL & STICK!

GETTING READY

MATERIALS

Dusting rag
Cleaning rag
Rubbing alcohol (best option) OR a Non-oil based cleaner, such as vinegar water
Clean Hands
A friend to help!

PREPARE YOUR SURFACE

The area you're applying your wall decal(s) to should be smooth, clean and dust free. Clean surface with dusting rag, and then wipe down the area SUPER well with your rubbing alcohol or non-oil based cleaner. Please note - if you use a cleaner with oil in it, the paper will not stick. Allow the surface to dry for a couple minutes after cleaning.

START APPLYING

REMOVING WALL DECALS from BACKING

Start at the top of the arch or circle, and peel the decal away slowly from the bottom sheet about 6 to 10 inches. It's like adult stickers!

APPLYING ARCH WALL DECAL

Smooth the first part of your arch or circle to the wall. Once it is placed and stuck, slowly start pulling back small sections of the backing, smoothing to the wall as you go, until the decal is placed completely on the wall and the backing is entirely removed. Make sure to smooth out all air bubbles with your hands (make sure they are clean!). If you can't get out all the air bubbles, you can poke an invisible hole with a needle or xacto knife and smooth out the bubble again. The air should come out.

IMPORTANT!

Keep an eye on the arch the next couple days. In rare cases, the arch may start peeling off. Simply clean the area under the peeled back area with rubbing alcohol and re-smooth again. This has always done the trick for me!

If you accidentally place your wall decal incorrectly, no problem! These "stickers" are repositionable on most clean surfaces a few times, and you can simply pull it off CAREFULLY and SLOWLY. Then reposition and press and smooth down again. When you want to remove you wall decals completely, simply peel off slowly.

**Textured wall hack - You can use Kylon Easy-Tack™ Repositionable Adhesive to help the arch stick on textured walls. Just spray on the wall prior to installation. Once you are done with the arch, you can wipe the easy tack off the wall with a cleaner. It's that simple!*

Thank you again for your purchase!
