How to install your REMOVABLE WALL DECALS...just PEEL & STICK!

GETTING READY

MATERIALS

Dusting rag

Cleaning rag

Rubbing alcohol (best option) OR a Non-oil based cleaner, such as vinegar water

PREPARE YOUR SURFACE

The area you're applying your wall decal(s) to should be smooth, clean and dust free. Clean surface with dusting rag, and then wipe down the area SUPER well with your rubbing alcohol or non-oil based cleaner. Please note - if you use a cleaner with oil in it, the paper will not stick. Allow the surface to dry for a couple minutes after cleaning.

START APPLYING

REMOVING WALL DECALS from BACKING

Find a corner of the wall decal and pull away from the sheet. It's like adult stickers everyone!

APPLYING WALL DECAL

Pick up your first piece and apply the decal, smooth out any air bubbles with your hands or a paddle-like tool (such as a credit card). Once securely applied, keep going, arrange the decals as closely or set apart as desire, and have fun!

If you accidentally place your wall decal incorrectly, no problem! These "stickers" are repositionable on most clean surfaces a few times, and you can simply pull it off CAREFULLY and SLOWLY. Then reposition and press down again. When you want to remove you wall decals completely, simply peel off slowly.

Thank you again for your purchase!
